1. Create a program in java for printing " Welcome to STCET" .
2. Implement a program to compare three numbers and identify the largest.
3. Create a program to take user input from the Scanner class of student name, roll number, department.

Example 1

```
class simple1{
   public static void main(){
    System.out.println("Welcome to STCET");
   }
}
```

Example 2

```
import java.util.Scanner;

public class uip{

   public static void main(String[] args) {

      // Creates a reader instance which takes
      // input from standard input - keyboard
      Scanner reader = new Scanner(System.in);
      System.out.print("Enter a number: ");

      // nextInt() reads the next integer from the keyboard
      int number = reader.nextInt();

      // println() prints the following line to the output screen
      System.out.println("You entered: " + number);
   }
}
```
